## DETAILED ACTION

### *Claim Rejections - 35 USC § 101*

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 16 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 16 directs to information *and* a medium. Since the information do not provide any functional interrelationship to the medium for controlling the medium to reading and access the information from the medium, or impart to any software and hardware structural components to perform a function that is processed by a computer, the information themselves can not make them statutory. See MPEP 2100. The recitation "the video data recording device ... picture video file" at the last two lines is an intended use since there is no recitation in the claim to specify how the video management information file is read out and is interact with any means or circuit of the recording device or reproducing device to reproduce the still picture file. Further, it is noted that claim 16 directs to a information on a medium, not to a recording/reproducing apparatus.

It is suggested that "An information recording / reproducing apparatus" lines 1-2, needed to be changed to -- A data recording /reproducing apparatus comprises an information recording medium -- to overcome the 101 rejection.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 17-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 17 is indefinite as being a hybrid claim. Claim recites a medium to store with information and method for recording the information however, claim do not provide any and connection and support between a medium and method since the claim do not provide any steps of generating or forming the audio/video data and control information from the medium.

Claim 18, last line, after "data area" should be inserted - based on the reproduced control information --.

***Double Patenting***

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 2621

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 16-18 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6,560,405. Although the conflicting claims are not identical, they are not patentably distinct from each other because the difference between claims 16-18 of the present application and claims 1-4 of U.S. Patent No. 6,560,405 is that claims 1-4 of U.S. Patent No. 6,560,405 additionally recite "user defined program chain " that is not found in claims 16-18 of the present application. Since the claims 1-4 of U.S. Patent No. 6,560,405 encompass claim 16-18 of the present application. It would have been obvious to one of ordinary skill in the art to modify and edit claims 1-4 of U.S. Patent No. 6,560,405 by eliminating "user defined program chain information " in claims 1-4 U.S. Patent No. 6,560,405. to produce claims 16-18 of the present application.
